

TRACcess™ Electronic Rapid Entry System

Instant fire department access without damaging the door or building

Fast Access to Property without Damage

The Rapid Entry System makes emergency access easier and more secure than ever before! Fire fighters can investigate an alarm or reported fire without damaging the building or risking injury. They simply obtain the keys to your building from a high security lock box, eliminating the need to force open a door or window. After hours, fire department access is fast and safe, without requiring the building owner or tenant to drive to the site. Help make it safer for the fire department to protect property, reduce injuries, and avoid unnecessary expense by installing TRACcess on your property.

Peace of Mind for Property Owners

TRACcess lock boxes are UL listed because they resist physical attack. The fire department controls all the electronic, master keys that open the TRACcess lock boxes. Furthermore, an electronic key alone is not enough to open a TRACcess lock box; one must also enter a secret PIN code. And, every time a lock box is opened an audit trail is created, recording the time, location and electronic key identity.

- **UL Listed TRAC-Vaults provide high security against attack and vandalism**
- **Only your Fire Department can operate master keys**
- **Complete audit trail each time site is accessed**

TRACcess padlocks may also be purchased for perimeter gates, industrial equipment yards, and storage areas.
