

Reduce Your Time to Reach Seniors and Other At-Risk Residents in an Emergency

Supra's Senior Lock Box Program

- Can save your emergency responders valuable time. Your central dispatch can simply notify the responders that a lock box is in use.
- Provides an alternative to forced entry. If a lock box is used, responders may not have to damage the senior's home.
- Provides peace of mind. Lock boxes are only accessible by authorized personnel in the event of an emergency, because only fire/police departments have keys that can open the lock boxes. Friends, family, and neighbors cannot use this system to access a home.

How the Program Works

The steps for a homeowner to participate are:

1. Request Order Form from fire/police department.
2. Complete and mail order form to Supra. The lock box is shipped to the homeowner.
3. Install lock box. (Check with local fire/police department for specific installation requirements.)
4. Contact fire/police department to secure property keys inside the lock box.

The fire/police department emergency first response personnel are the only ones that have access to the lock box.

Trust Supra Lock Boxes

- Supra only provides keys to authorized fire/police departments.
- Emergency responders only open lock boxes if a resident cannot open the door themselves.
- For more than 50 years, Supra has been a leader in lock boxes. We supply fire departments, real estate agents, and consumers throughout North America.
