

New KeyBox secures large key fobs

The Supra KeyAdvantage System now features a longer KeyBox to secure today's automotive key fobs. With more storage room than its previous generation, the new KeyAdvantage KeyBox accommodates a larger smart shield. Smart shields are designed to encase the key fobs so that "open" signals cannot be transmitted to the vehicles. Together, the new, longer KeyAdvantage KeyBox and Smart Shield 3 provide twice the capacity to store keyless entry devices of many shapes and sizes.

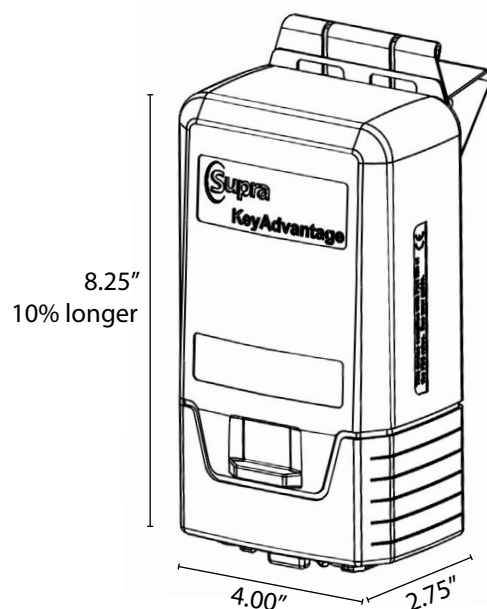

The KeyAdvantage electronic key control system combines convenience with accountability. It provides immediate access to keys at the vehicle, allowing salespeople to stay with their customers throughout the sales process. Key tracking information is available right at the car in addition to activity reports through the KeyAdvantage software.

Features:

- Accommodates large key fobs
- Drop-down key pouch design protects keys in severe weather
- Records access activity -- who took the vehicle key as well as when, why, and for how long
- KeyBox can be queried to find who has the key
- Secure system helps prevent unauthorized access via assigned KeyPad PINs and programmable user profiles
- Snap-shut closure
- Steel construction with protective rubber boot

Benefits:

- One size fits a range of key fobs
- Stay with your customers through the sales process
- Reduce lost and missing keys
- Find missing keys while at the vehicle
- Demo more vehicles and close more sales
- Improve inventory management
- Increase employee accountability

KeyAdvantage KeyBox paired with Smart Shield 3 offers a complete solution

The new KeyAdvantage KeyBox accommodates a larger smart shield to block the signals from keyless-entry devices. The Smart Shield 3 is designed to hold today's larger key fobs. The shield enables you to store the key securely at the vehicle in your KeyAdvantage KeyBox without releasing an "open" signal to unlock the vehicle. To help maximize your investment, the Smart Shield 3 is designed with extra room to hold even larger key fobs that manufacturers may introduce in the future.

Features:

- Twice the capacity of our standard proximity shield
- Removable shield is compatible with larger KeyAdvantage KeyBoxes
- Blocks the vehicle entry signal
- Lightweight aluminum
- Simple operation
