

Supra KeyAdvantage: UAG's Fayetteville AutoPark improves operations with KeyAdvantage!

Lance Rogers says KeyAdvantage is not just key control, but also a great sales tool for the team!

Fayetteville AutoPark has installed the KeyAdvantage system for our Toyota, Honda, Chevrolet, and Acura dealerships. Employees access vehicles only at the time we set and tracking is available right at the car without having to go back to the showroom. We generate nightly activity reports to help with access monitoring, demos and inventory aging.

We have used both key machines and key boxes in the past. With KeyAdvantage, we have the combined advantage of sales efficiency and the accountability we need. Our salespeople can access any car throughout the AutoPark and remain with the customer at all times. This provides better service for our customers and translates into more sales demos.
