

Supra KeyAdvantage:

Toyota of Rockwall sells more with KeyAdvantage!

“No more waiting for our customers!”

“We love the system because it means no more waiting for our customers and our staff is more efficient. KeyAdvantage helps us speed up our sales process while providing more attention to detail and customer service. We can do all this and still be able to track our keys! We especially appreciate being able to move through cars quickly when dealing with the hot sun or rain.

A great feature is that we also have tracking information right at the vehicle. We can find out at the car who was responsible for each access without ever having to run back to the showroom.

The bottom line is that we sell more cars because we stay with the customer and remain engaged. If we had to run back to the showroom this would affect our customer service and sales.”
