

TRACcess for Building Owners

Authorize access to your building's keys... ...with a click of your mouse

Save time, increase control, and reduce frustration with TRACcess

Go Key-less

Free your staff from the tedious chore of duplicating, distributing, and collecting mechanical keys. A secure TRACcess vault or lock on your building means that your preferred vendors can get access when it's needed. You won't spend time duplicating or searching for keys in order to let them in.

Eliminate Vendor Meets

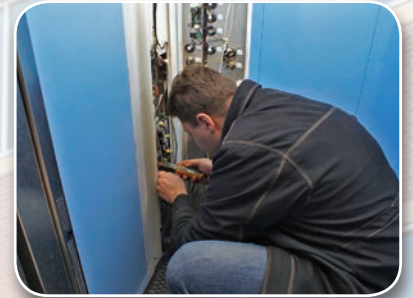

Increase your organization's productivity and peace-of-mind by ending disruptive calls to "come admit the vendor." Late calls and after-hours vendor meets will no longer be needed for overnight maintenance and repair services.

Increase security and control

TRACcess keys cannot be duplicated. The keys expire automatically and require PIN code activation so they're useless if lost or stolen. You can audit every time your vault or lock is accessed. Download activity reports from the comfort of your office, and grant (or revoke) access rights with the click of your mouse.

Install TRACcess economically

Power and communications infrastructure are provided by the key, so no expensive wiring or infrastructure are needed to install TRACcess vaults and locks. Choose your vault or lock, have it mounted or embedded near your door, and you'll be ready to put TRACcess to work.
